

## Mechanical processing

We offer a broad range of procedures for the further processing of components made from stainless steel, brass, silver, gold as well as aluminium and plastic.

- Laser engraving/laser marking
- Drag finish polishing
- Machine polishing
- Hand polishing
- Diamond polishing of non-ferrous metals
- Guilloche work
- Vibratory finishing
- Satinising
- Surface grinding
- Decorative blasting
- Deburring by hand
- Drilling
- Trimming
- Shaping
- Mechanical engraving
- Contract cleaning in aqueous media as well as solvent systems

Naturally all processing and cleaning processes correspond to the legal requirements and environmental conditions.

**Are you interested in our extensive mechanical processing options?  
Then call us - we're there for you.**
